**Subject:** Microsoft Settlement

Since when is it against the law for a company to make money? Please leave Microsoft alone as it was doing just fine. Example of a problem incurred by the above settlement: I just recently purchased a new computer with XP Home edition and it is missing some of the utilities that Microsoft included in their other editions and is still in XP Pro. This utility is not on the market by other suppliers and therefore I am unable to purchase and install it on my XP Home edition computer. Thank you
